

# MAYFLOWER VEHICLE SYSTEMS

## BUILT SOLID

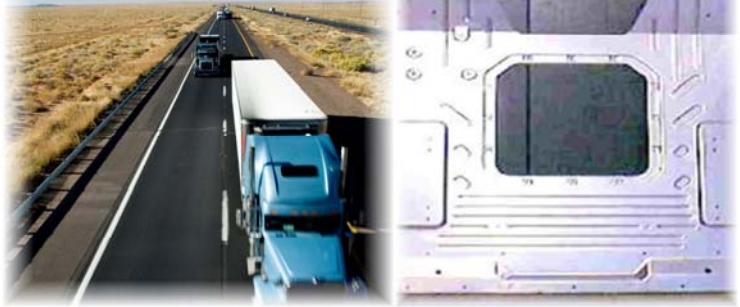

Mayflower Vehicle Systems, our CVG Structures Division flagship company, builds a solid and steady environment around our customers. Whether we're expertly manufacturing sturdy aluminum and steel cabs for the trucking industry or designing the auto body for the dynamic Ford GT, our first-class engineers are constantly hard at work creating innovative concepts, state-of-the-art designs, and industrious solutions to future challenges.

*"At the heart of our success is a dedicated project environment bringing together the right mix of people, process and technology-truly multi-disciplinary dedicated program delivery."*

In addition to our talent in creating large stamping components and cab sleeper boxes, we also offer our customers small and medium stamping capabilities, comprehensive manual and robotic welding skills, and precise laser cutting.

We have a wide array of low-cost forming capabilities and a flexible manufacturing environment, making us a respected stamping supplier to trucking industry heavyweights like Volvo, International Truck and Engine and Freightliner.

Our capabilities are extensive ranging from full body e-coat line, body-in-white assembly lines, and MIG and TIG welding to hemming, bonding, and body sealing.

- Automated and low volume capability
- Full Body e-coat line
- Small/medium component stamping capability
- Low and medium volume stamping and assembly
- Robotic laser cutting
- MIG & TIG Welding
